

Occupational Health & Safety Policy

At Mediterranean Maritime Hub we value safety.

The way we behave, act, work, lead and assess our operations is a demonstration of our commitment towards the prevention of injury and ill health, creating a healthy and safe working environment for our personnel and all those who may be affected by our work.

We believe that this is not only our moral and legal obligation but our core value and a solid foundation towards creating a productive workforce that will consolidate our position at the forefront of the industry.

Our goals will be achieved by providing the framework to ensure legal compliance and for setting, reviewing and implementing continuous improvement to the safety management system with the active participation of the workforce, investment in our infrastructure and assets but more importantly in our personnel with ongoing training to meet and excel in industry safety standards.

Angelique Abela

Executive Chairperson
