

Spill Response Policy

The logo for MMH, consisting of the letters 'MMH' in a bold, white, sans-serif font, enclosed within a white rectangular border with rounded corners.

MMH Malta Ltd recognizes its responsibility to respond to spillages that may be caused as a result of its activities.

The responsibility for spill prevention and environmental protection is shared by every individual.

MMH will assess the potential of spill scenarios at each location under its control and will identify and prioritize potentially impacted environmental and community assets.

Appropriate response options that will minimize a potential spill's impact on these assets will be selected.

The company will demonstrate in a formal Spill Response Plan, the systems and resources in place to act quickly and effectively in the event of a spill. The use of private response and clean up organizations to supplement in-house capabilities will be included within the response plan.

The Spill Response Plan will be drawn up in line with relevant requirements stipulated in Reg. 76 of S.L. 499.12 'Dangerous Cargo Ships, Marine Terminals and Facilities and Bunkering Regulations'.
